## Save Money on Installation

- Innovative design easily sets cap in place for efficient, time-saving construction
- Coming in a 16' standard length, each order is custom manufactured to design specifications
- Various pitch-styled widths are available up to 26"

## Durability You Can Count On

- Flat, stable framing material that won't cup, warp or twist over time
- Will not delaminate, become spongy or lose fastener holding strength when exposed to the elements in typical commercial construction
- StandGuard (LSL) engineered lumber treated with zinc borate for exceptional resistance to insects, fungus and decay
- LSL holds fasteners as well as regular dimensional framing lumber
- Features MDI Resin, a 100% waterproof bonding agent that turns to durable plastic when cured

## Flexible Options to Suit Your Project Specifications

- Can be flat or pitched up to 3/8" drop per lineal foot
- Available in insulated and non-insulated
- Customized countersinking cutouts fit any bolt type
- Optional metal flange attaches to parapet wall for self-alignment
- Can be easily cut out to match building angles
- A sustainable, NAHB National Green Building Certified product that can contribute LEED points when seeking certification

*\* The Parapet Cap by PreBuck offers a 25-year limited warranty with AWP standards for use category 2 (uc2).*
